TESTIMONIAL - THANK YOU

I would like to thank Karen and the team at Gray Matter, for an outstanding job delivering the new roundabout at Hanlin Road. The project was very high profile, as it was outside the National Velodrome and St Peter's School in Cambridge.

Gray Matter were involved from the beginning with project planning, and other activities needed to get funding approval. Gray Matter led project and stakeholder workshops, and completed a comprehensive business case for the works. Gray Matter also led investigations and completed the design work and contract documentation, and well as project supervision, and MSQA.

Throughout the process, the Gray Matter team acted professionally and ensured tough questions were not avoided, and overall our stakeholders and partners enjoyed the positive, collaborative, honest and friendly approach taken.

The end result is one the community is proud of, and looking at the project I can see many areas, where the inputs led by Karen and the team made a difference and ensured that value was added. Additional cycle paths and bus access was able to be incorporated into the design.

Karen also managed to keep all the parties working towards common agreed goals.

The construction also was disrupted by the COVID lockdown and Karen kept the project construction moving forward, and ensured that the all parties managed their own risks positively and collaboratively.

I would have no hesitation in recommending the Gray Matter team for other works.

Yours sincerely

Paul Strange
